Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Von Kohorn in view of Yang.

Von Kohorn shows an illuminated vase, which provides a separate waterproof chamber housing a light source and an upper area, which can contain cut flowers in a container filled with water. Various embodiments are shown in the figures. Von Kohorn discloses that the light source may be a fluorescent light bulb. Yang teaches that it is known in the art to provide decorative lighting in an artificial environment, which includes a plurality of different colored light emitting diodes (LEDs), a controller 40 and a microprocessor 41 with multiple switches. The microprocessor has a plurality of programs to drive different colored LEDs or to vary how the lighting occurs as with blinking or flashing. While Yang uses multi-colored LEDs to vary the illumination of the flowers, Yang also discloses that it was known in the art to use a colored disk 55 (figure 5) to vary the illumination. It would have been obvious to one skilled in the art that Von Kohorn could have been modified to use a more updated approach to illumination through the use of fiber optic lighting with a plurality of LEDs in the same manner as

taught by Yang because both references are directed to illuminating a flower arrangement.

Allowable Subject Matter

Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claims 16 and 17 are considered to have allowable subject matter because Claim 16 sets forth that the housing is partially submerged in water in the chamber in the vase. This combination of limitations was not shown or suggested by the prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wang, Glass, Steffens, Clough and Greenspan are cited of interest for showing various arrangements for decorative lighting for flowers, real and ornamental.
